About

I am an aspiring ML Engineer who combines a love for coding with pop culture and gaming/esports, with experience in creating ML, DL, Computer vision and other models, I find myself relatable to computers due to my algorithmic thinking process and creativity. I approach each and every challenge with efficiency and goals set for the same. Continuously seeking opportunities and challenges to help me increase my proficiency with my skills as well as improve myself as a person.

Professional Experience

Community Manager

Metaverse Technologies, Bengaluru, Karnataka

September 2021 - November 2023

- **Responsibility:** Responsible for fostering a vibrant and positive online community surrounding our social networking platform.
- **User Engagement:** Actively engage with users by responding to comments, messages, and posts on the platform.
- **Community Building:** Develop and execute strategies to grow the community and attract new users. Plan and organise events, contests, or campaigns to encourage user participation.
- **Data Analysis:** I analyse community engagement metrics and user feedback to gain insights and implement data-driven decisions.
- **Communication:** Created and distribute newsletters, announcements, or updates to keep the community informed. Act as the voice of the community within the company, conveying user feedback and concerns to relevant departments.
- **Content Creation:** Generate and curate content, such as blog posts, articles, or videos, to share within the
